

FACT SHEET: SASOL CURRENT PRODUCT SLATE FACTS¹

LIQUID FUELS

Sasol Secunda and NATREF are the only inland refineries in SA producing **61%** of the total inland fuel demand (**9.1 billion liters**).

JET FUELS

Sasol Secunda and NATREF are the **only inland producers of jet fuel**.

LPG

Secunda is **one of two refineries producing LPG** in SA. It is the **only inland LPG producer**. LPG's final product application is heating fuel and use in cooking equipment.

SODIUM CYANIDE

Sasol is the **sole producer of liquid cyanide in SA**. This is a crucial component in the gold mining industry.

AMMONIA

Sasol is the **largest producer of ammonia in SA** (meeting **78%** of total demand). Ammonia is used to produce mining explosives and fertilizers for farming.

ETHYLENE AND PROPYLENE

Sasol is by far the largest **producer of Ethylene and Propylene in SA**. These are used to produce chemicals like acrylic paint and **80%** of plastic conversion feedstock.

SASOL'S SUSTAINABLE PRODUCT FUTURE

GREEN HYDROGEN (H₂) AND DERIVATIVES

Investigating **3 – 5 mt green H₂** export opportunity by **2050**, translating to **2-6% of expected global H₂ production** (1.5 times Secunda's current fossil fuel H₂ production)

SUSTAINABLE AVIATION FUEL (SAF)

By **2050**, Secunda and NATREF aim to meet **SA's total SAF demand**
