- 4 Figures refer to **all logistics-related events** that result in any one of the following: (i) a recordable injury (including fatality) to any Sasol employee, or an injury to any other person that requires overnight hospitalisation; (ii) measurable or visible damage to livestock, vegetation, crops, fish or water systems, or a release of more than 1 000 litres of a chemical; (iii) property, product and/or transportation equipment loss (to Sasol) of more than US\$25 000, except in Europe, where it is greater than €25 000, or any fines or penalties involving Sasol; (iv) fire, explosion or reactive chemical incident involving a Sasol product; (v) any community evacuation of sheltering or any community alert given as a result of the incident, or any road closure lasting more than six hours; or (vi) the involvement of the international, national or local media.
- 5 **Illnesses** are recorded as work-related as a precautionary measure. The various evaluation authorities may subsequently classify them as not work related, in which instance they are removed from the records.
- 6 **Tuberculosis (TB)** is by and large not work-related. For mineworkers it is reportable to the authorities as a “medical monitoring illness”. HIV/Aids increases the risk of contracting TB and the majority of TB patients are HIV positive.
- 7 **Investment in employee learning** excludes the compulsory 1% skills levy.
- 8 **Black employees** refers to African, Coloured and Indian people – for the purposes of South African employment equity considerations.
- 9 **Restated** to reflect the adoption of the consolidation suite of accounting standards.
