

SASOL FACTS

Our business model

By transforming our stocks of capital through our business activities, we are able to deliver on our strategy and advance the United Nations Sustainable Development Goals (UN SDGs). As we convert hydrocarbon feedstock into a range of high-value products, we seek to be inclusive, responsible and sustainable. Our intention is to maximise value creation and minimise negative impacts.

Products delivered

Chemicals

million tons: 6,3

Liquid fuels

million barrels: 51,7

Secunda Operations total refined production

kilotons: 6 990

Liquid fuels white products

million barrels: 49,1

Liquid fuels black products

million barrels: 2,6
